

Heating Mantle (+450°C)

LABEC high quality **Heating Mantles** are available in 50ml, 100ml, 250ml, 500ml, 1 to 5 litres and 10 litres capacity.

The heating mantle has a built in simmerstat controller to regulate temperature to 450°C.

The flexible coiled heating element provides excellent heat transfer while absorbing shock to minimise flask damage.

The rigid housing supports the weight of the vessel and provides uniform heating of the vessel without the danger of an open frame.
